# E-BIKE EDUCATION EVENT

Join us for a discussion for parents and kids (3rd grade and older) about the increasing number and severity of related injuries from e-bikes and other micromobility devices and learn about ways to reduce risk.

## INJURIES ARE ON THE **RISE**:

**We're seeing more micromobility related injuries – and they're more severe.**
Head injuries, fractures and long-term impacts are increasing, especially among kids and teens.

E-BIKES

SCOOTERS

SKATEBOARDS

AND MORE

## Panel speakers:

- Physician – Understand the impact of micromobility injuries
- Police officer – Safety tips and local ordinances
- Rehabilitation Manager – Understand the recovery process after injury
- Injury Prevention Manager – Injury risks and prevention strategies

**Tuesday, November 10**
6:00 – 7:30 p.m.

**Children's Therapy Services**
1500 S Lemay Avenue

**RSVP Required:** www.uchealth.org/events (search "e-bike")

Note: There will be a separate presentation for 3rd graders; however older siblings can join. Younger children must be accompanied by a guardian at all times. **Daycare will not be provided.**
